

Useful References

The Case Study presents a host of Core Challenges faced in the Bench Sheko Zone, as well as Contextual Information to further your understanding of the Region. It is important to read through the Case Study, but equally, you should conduct your own research. Research is one of the YSE criteria - it will allow you to score higher marks, by backing up your project ideas with evidence from sources.

Listed below are some useful references for you to read. You don't need to use them all, but they are provided to give you some guidance. Please also feel free to find your own sources too.
